

cycle to work

*and feel
the benefits*

Thinking about cycling to work? Here we dispel the myths so you can feel the benefits.

“IT’S TOO DANGEROUS”

The chances are you can cycle to work a different way to your usual journey. Use Google Maps or MapMyRide to find your safest and easiest route to work.

“I’M TOO UNFIT”

Start off small. We recommend just cycling part of the way and then build it up from there, or consider an Electric bike.

“I CAN ONLY SHOP AT HALFORDS”

As well as Halfords you can also shop at Tredz or at hundreds of independent bike shops across the UK. You can access 98% of UK bike brands.

“I’M A HYBRID WORKER SO WON’T BE ABLE TO TAKE PART”

Whether you work from home or travel to the workplace, you can take advantage of this brilliant scheme.

“I CAN ONLY GET A COMMUTER BIKE”

No. Because everyone’s commute is completely different, we offer every type of bike on Cycle2Work - from mountain to electric.

“I NEED PROPER CYCLING CLOTHING”

You can wear anything from your work shirt to gym gear while cycling - whatever you feel comfortable and safe in.

“I LIVE TOO FAR AWAY”

You can still take part in Cycle2Work. If you don’t feel like you can cycle the whole way, you can just use the bike to assist your journey.

“I’LL BE SWEATY”

Most riders wear light clothes and take it easy. If you are conscious about arriving hot and bothered, we recommend scoping out the showering and changing facilities and get ready when you arrive.

“I HAVE A COMPANY CAR, ALLOCATED PARKING OR TRAIN TICKET”

This doesn’t matter, you can still take part in Cycle2Work.

“I DO THE SCHOOL RUN”

Why not get the kids involved too? Child seats and child trailers are available on Cycle2Work - or if they have their own bike, ride together!

“I CAN ONLY TAKE PART ONCE”

No. You are able to apply again as soon as you have completed your deductions.

“DRIVING IS QUICKER”

Traffic is the main cause of long commutes, and by cycling to work you can often find quicker shortcuts to get there. Don’t forget that electric bikes can go as fast as 15mph, making cycling to work a breeze.
